

Dear Customer

We have been concerned for some time at the spiralling costs involved in owning a caravan. Servicing charges have risen to a level that could prevent our customers from having their caravan regularly checked thus raising safety issues.

Safety has to be our number one priority and to this end we provide a two tier Service. With our **PREMIER SERVICE** you can have your caravan fully serviced with a thorough check on all fixtures and fittings.

Our **BASIC SERVICE** checks all safety aspects both inside and outside the caravan to a level that will be comfortable for your pocket and your peace of mind.

When booking in please ask for either Premier or Basic. Choosing the Basic will not invalidate any manufacturer or insurance warranty. Should you have warranty problems our staff will ask you in advance of the caravan coming in to enable us to prepare for all eventualities.

REMEMBER – We have full facilities here at Swindon Caravan Centre and do not cut corners or charge for minor extras.
